

Teledyne Geospatial

Imaging Solutions for Land and Water

About Teledyne Geospatial

Teledyne CARIS and Teledyne Optech have united to form the new Teledyne Geospatial offering holistic solutions to seamlessly map land and water through the integration of industry-leading lidar sensors and world-renowned software workflows.

This collaboration empowers customers with a competitive edge in mapping and delivering data products inside of one complete workflow. Ease of collection and processing through to final products is enhanced with efficiency-driving AI noise classifying algorithms and real time quality control.

We look forward to discussing how our solutions effectively solve your problems.
